

# PRIVATE PARTICIPATION IN INFRASTRUCTURE DATABASE

PPI data update note 84

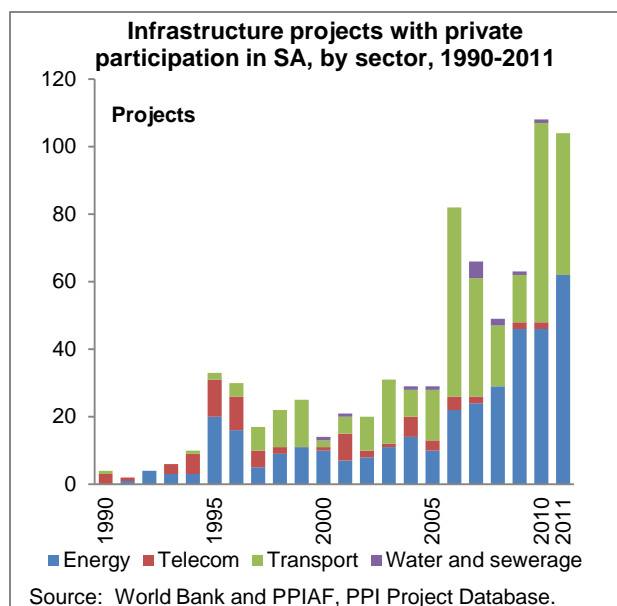

September 2012

## Private activity in infrastructure in South Asia slides back to 2009 levels

### Overview

In 2011, 104 new infrastructure projects reached financial or contractual closure in four low and middle income countries in South Asia (SA) region: Bangladesh (6), India (92), Pakistan (2), Sri Lanka (4).<sup>1</sup> Total investment commitments (hereafter, *investment*) in all infrastructure projects reached US\$41.5 billion, of which US\$35.4 billion were investments in new projects and US\$6.5 billion were investments in existing projects. As compared to 2010 investment levels, total investments in 2011 decreased by 45%. Particularly additional investments in existing assets decreased, by 76%.

### Sector focus

In South Asia, 62 **energy** projects reached financial closure in 2011, a 34.7% increase compared to 2010 activity levels. Investment in energy projects, however, amounted to only US\$19.6 billion, a 51.1% percent decrease from 2010 levels. This was mainly influenced by the fact that, in 2011, only six large non renewable energy projects, each involving over 1,000 MW in capacity and over US\$1 billion in investments closed, as opposed to 11 in 2010. Finally, in response to the continued power shortages in Bangladesh, five rental power projects closed in 2011, the same number as in 2010. Rental projects involved US\$214 million, less investment than other Greenfield power projects, like build-own-operate (BOO) or build-own-transfer (BOT).

This note was written by Andreea Militaru, Consultant, Finance Economics and Urban Development Department, Sustainable Development Network, World Bank

<sup>1</sup> Data on infrastructure projects with private participation include primarily medium-size and large projects in low and middle income countries as reported by the media and other public sources. Small-scale projects are generally not included because of lack of public information. More information is available at <http://ppi.worldbank.org/>.

In the region, 42 **transport** projects closed in 2011, 28% fewer than in 2010. Two seaport projects closed in India and Sri Lanka, two rail projects closed in India, and 38 roads projects also closed in India. The Colombo South Container Terminal project located in Sri Lanka was the second transport project with private participation that has closed in the country since 1990. Total investment in transport projects amounted to US\$17 billion, a minor 4% decrease from 2010 levels. The fact that there were fewer projects yet investment levels saw only a minor decrease can be explained by a recent trend where private participation in transport projects is concentrated on larger-scale projects.

In the **telecom** sector, 34 providers invested a total of US\$5.2 billion to expand their existing assets. The largest investment was made by Vodafone Essar in India, US\$1,708 million. Bharti Airtel and Idea Cellular also made large investments, of US\$816 million and US\$944 million, respectively. Providers offering mobile services only were responsible of the majority of the investment in the sector, with US\$3.3 billion.

No **water and sewerage** projects closed in SA in 2011; there hasn't been any investment recorded in this sector since 2009.

**Sponsor focus**

Sponsors in **energy**: US\$19.2 billion were invested in SA in 2011 across 66 energy projects. US\$18.3 billion represented investments in new projects, while the remaining US\$900 million represented additional

investment committed to projects closed prior to 2011. Indian sponsors were dominant with investments over US\$17.5 billion across 46 projects. Bangladesh sponsors ranked second with five energy projects followed by U.S. sponsors with four projects. In terms of investment, Malaysian sponsors ranked second with over US\$1.2 billion in investments across two projects, followed by UK sponsors with over US\$722 million in investments across two projects

Sponsors in **transport**: US\$17 billion was invested in transport in SA in 2011 across 42 projects. The entire amount represented investment in new projects. Indian sponsors dominated in terms of number of transport

projects (41) and in terms of investment amounts in transport projects, US\$16.5 billion. They only invested locally. Chinese sponsors ranked second in terms of number of transport projects and third in terms of total investment in transport projects US\$1.5 billion. Chinese sponsors generally co-invested in projects with local Indian sponsors.

Sponsors in **telecom**: US\$5.2 billion were invested across 34 existing projects. Indian sponsors (Essar Group, Bharti Airtel and others) ranked first with investments of over US\$3.9 billion, followed by U.K. sponsors (Vodafone and Vodafone-related companies).

## **Featured project**

### **SEW Bichom HPP (India) | Electricity Generation: Large Hydro | Greenfield BOO | PPP**

#### **Project Information**

On 14th September 2007 SEW Infrastructure Limited signed an Implementation Agreement with the Arunachal Pradesh Government for setting up a 2x48 MW run-of the river type hydro power project on Bichom River, a tributary of Kameng River in West Kameng district of Arunachal Pradesh. Post environmental clearance in September 2011, the capacity was revised to 2x60MW. The electricity that is generated shall be exported to the Northern, Eastern, Western, and North Eastern (NEWNE) grid through the North Eastern Regional Load Dispatch Center (NERLDC), where it will provide power to the North-Eastern states of India: Arunachal, Assam, Meghalaya, Manipur, Mizoram, Nagaland, Tripura.

#### **Government support**

Arunachal Pradesh State Electricity Board (APSEB) signed a power purchase agreement (PPA) with SEW Nafra Power Corporation Private Limited, the Special Purpose Vehicle (SPV) established to implement the project. Once the state regulator APERC, approved the agreement approved PPA, APSEB would purchase electricity at the leveled rate of US\$0.078/Unit from the date of commissioning. Out of the expected net energy generation, 12% of the energy generated was to be provided free of cost to the Arunachal Government. SEW Nafra was also expected to give free power (up to 35 units) at INR 0.01/kWh for local catchment area development. SEW Nafra Power had represented its case for carbon credits for the project, and UNFCC was currently validating the project. The financial benefits of the revenue obtained by selling of the CERs could improve the equity internal rate of return (IRR) of the project.

#### **Financial Information**

Financial closure took place in August 2011 at a debt to equity ratio of 70/30. The estimated cost of the project was US\$193.6 million (INR9,100 million). Financing comprised of a 14-year and nine-month term loan of US\$ 135.5million (INR6,370 million) and US\$58.1million (INR2,730 million) in sponsor equity. The term loan had a grace period of one year and a repayment schedule of 41 quarterly installments. The loan was priced at 375 basis points over the prevailing State Bank of India base rate. The participating banks were State Bank of India (INR2,120 million), L&T Infrastructure Finance (INR1,500 million), Bajaj Finance Ltd (INR1,000 million), State Bank of Bikaner & Jaipur (INR750 million), IIFCL (INR1,000 million). SBI Capital Markets was the lead arranger.

Pre-construction activities of the project started in January 2012. The execution of the EPC contract is expected to be completed by January 2015.

**Table 1 Projects with private participation reaching financial or contractual closure in SA in 2011**

Energy						
Country	Project Name	Type of PPI	Subtype of PPI	Segment	Total Investment (US\$ millions)	Sponsors
Bangladesh	Siddirganj (Dutch Bangla power) plant	Greenfield project	Rental	Electricity generation	39.4	Others (100% / Bangladesh)
Bangladesh	Noapara (Khanjahan Ali)	Greenfield project	Rental	Electricity generation	15.7	Khan Jahan Ali Group (100% / Bangladesh)
Bangladesh	Meghnaghat (IEL) power plant	Greenfield project	Rental	Electricity generation	39.5	Others (100% / Bangladesh)
Bangladesh	Khulna (KPCL) power plants	Greenfield project	Rental	Electricity generation	88.7	Khulna Power Company Limited (100% / Bangladesh)
Bangladesh	Ghorasal (Max) power plant	Greenfield project	Rental	Electricity generation	30.9	Max Power, Bangladesh (100% / Bangladesh)
Bangladesh	Comilla Union Consultants power plant	Greenfield project	Build, own, and operate	Electricity generation	55	Energy Venture Ltd (50% / Australia), A T Consultant Pvt Ltd (50% / India)
India	Videocon Warora Solar Plant	Greenfield project	Build, own, and operate	Electricity generation	18.9	Videcon Group (100% / India)
India	Videocon Jodhpur Solar Plant	Greenfield project	Build, own, and operate	Electricity generation	19.1	Videcon Group (100% / India)
